

The Finnish Economic Papers is an anonymously reviewed journal publishing both theoretical and empirical contributions in all fields of economics. The Finnish Economic Papers is published biannually by the Finnish Economic Association and the specific purpose of the Finnish Economic Papers is to foster research on small economies.

The Finnish Economic Papers relies on the voluntary professional service of our referees whose identities are treated confidentially. The anonymity of the author is also preserved in most cases. We try to provide reviews of the manuscripts within three months.

FEP Prize

To encourage submissions of high level scientific research for the FEP, the Finnish Economic Association has instituted a prize of EUR 3000 for the best article published in the FEP during a two-year period. The next prize will be awarded for the best article published in the FEP during 2011 and 2012. We look forward to receiving submissions of sufficiently high quality to be included in the competition.

The first FEP prize for articles published in 1997-1998 issues was awarded to **Jan Klavus**

for his article

Progressivity of Health Care Financing: Estimation and Statistical Inference
(Finnish Economic Papers, Autumn 1998, pp. 86-95).

The second FEP prize for articles published in 1999-2000 issues was awarded to **Dan Anderberg**

for his article

Adverse Selection, Competition and Linear Self-Insurance
(Finnish Economic Papers, Spring 1999, pp. 3-15).

The third FEP prize for articles published in 2001-2002 issues was awarded to **Erik Fjaerli and Diderik Lund**

for their article

The Choice between Owner's Wages and Dividends under the Dual Income Tax
(Finnish Economic Papers, Autumn 2001, pp. 104-119).

The fourth FEP prize for articles published in 2003-2004 issues was awarded to **Juha-Pekka Niinimäki**

for his article

Fairly Priced Deposit Insurance under Adverse Selection
(Finnish Economic Papers, Spring 2003, pp. 38-48).

The fifth FEP prize for articles published in 2005-2006 issues was awarded to **Andreas Knabe and Peter Birch Sørensen**

for their article

Outsourcing of Public Service Provision: When is it more efficient?
(Finnish Economic Papers, Spring 2006, pp. 3-15).

The sixth FEP prize for articles published in 2007-2008 issues was awarded to **Tomi Kyrrä**

for his article

Estimating Equilibrium Search Models from Finnish Data
(Finnish Economic Papers, Autumn 2007, pp. 139-165).

The seventh FEP prize for articles published in 2009-2010 issues was awarded to **Andreas Pfingsten and Reiner Wolff**

for their article

Factor Supply Changes in Small Open Economies: Rybczynski Derivatives under Increasing Marginal Costs

(Finnish Economic Papers, Spring 2009, pp. 9-20).

The eighth FEP prize will be awarded in the spring of 2013 for articles published in 2011-2012 issues.
